

COMMUNITY DAY SERVICES

**"EMPOWERING
INDIVIDUALS
TO PURSUE
GROWTH AND
WELLNESS."**

Through long-term support and assistance, people with intellectual and developmental disabilities (IDD) can achieve productive, meaningful lives that reach their fullest potential.

ComWell's Community Day Service Program provides assistance and enhances mobility, personal independence and job readiness. It's a place for individuals to develop socialization skills, gain work experience and continued education.

We offer a setting independent from the individual's home to support them in learning skills related to activities of daily living, confidently making personal choices and fostering friendships through vocational and social activities as well as personal advocacy, competitive employment as well as on-site sheltered employment.

We provide opportunities for clients to celebrate and serve their communities through volunteer experiences as well as organizational opportunities such as Boy Scouts to learn team work and valuable skills.

We are always expanding and looking for new things to participate in that will contribute to our mission of integration and independence.

ELIGIBILITY AND ENROLLMENT

An individual can choose to be "private pay" or to be funded by awaiting selection from the Prioritization for Urgency of Needs for Services (PUNS) list. Through this, clients are selected to receive funding based on availability of state funds as well as the needs of the client or family.

To be put on the PUNS list, the Southern Illinois Case Coordination Services in Randolph/Washington County must be contacted. An individual service coordinator (ISC) agent will meet with the individual, guardian and family to ask and answer questions, explain available services and identify specific needs for the individual(s).
